Logistics

Labeling & Coding Solutions

ID Technology designs, manufactures, and integrates custom identification systems for efficient, reliable labeling and coding performance. Our extensive experience and innovative solutions provide you with durable labels and labeling systems that are easy to integrate and use. We have the technologies to meet the challenges of your industry, regardless of the size of your operation.

LABELING & CODING

:!!: ID TECHNOLOGY®

Labels

Labels play a critical roll in efficient warehouse operations. Identify inventory, warehouse locations, and other elements for improved tracking and data collection.

Labels are essential for managing inventory and moving products throughout your distribution facility. Choosing the correct label system that is tailored to your warehouses' needs reduces time spent picking items from shelves, increases inventory accuracy, and streamlines shipping and receiving.

Logistics Barcode Labels

We supply custom printed barcode labels for your logistics applications, including labels that comply to all the GS1 standards, as well as labels designed for MIL-STD-129 for the DoD supply chain.

- Rugged labels that withstand the wear-and-tear of warehouse environments.
- Specialized labels for cold storage or harsh elements.
- Digital printing for customized labels, variable data, short and long runs.
- Serialized barcode labels uniquely identify each carton or container to drive distribution operations.
- Any shape or product surface type.
- Standard, durable, and removable adhesives.

Our six label converting facilities across the US and Canada provide quality label production
and continuous service during peak demands.

Logmatix Warehouse Labels

Logmatix warehouse labels identify all the elements in your warehouse and logistics system, from bin labels to overhead reflective placards. Reduce time wasted looking for inventory using labels and signs that pinpoint the correct location of all of your products. Accurate, efficient inventory placement and picking gives you better tracking and reduces costs:

- Small labels to fit small bins
- Shelf and rack labels
- Hanging placards
- Magnetic labels
- RFID enabled location labels

Our custom solutions remain readable, even when subjected to constant, heavy traffic and use.

Labeling Systems

A labeling system failure means a stop in production. Labeling systems from ID Technology keeps your labeling operation moving to reduce downtime, save costs, and ensure customer satisfaction.

ID Technology labeling systems give you an alternative to error-prone and slow manual labeling Our solutions automate labeling by integrating directly into your production line to reduce inefficiencies and mislabeling.

For Cases, Cartons, Shipping Containers

Label Printer Applicators

ID Technology's range of label printer applicators offers a modular design and quality construction. Apply labels consistently and accurately in any type of production environment:

- Label one or multiple sides.
- Print and apply labels in real-time.
- Extensive range of applicator modules.
- Your choice of OEM print engine.

Model 252 3-panel label printer applicator with choice of proven OEM print engine (SATO, Zebra, or Datamax.)
Model 255

The Model 255 is perfect for materials handling system integration and for end users wishing to fully integrate labeling into a warehouse or logistics system. Built on our proven 252 platform, the Model 255 brings a new level or control and communication to your material handling system.

Model 350EHS

ID Technology's Model 350 is the ultimate labeling system for integration into automatic systems, especially for automatic receiving applications where a label needs to be printed and applied to the top face of boxes that vary in height.

Pallets and Boxes

ID Technology's 3-Panel Smart Tamp label printer applicator provides a rugged and flexible solution for printing and applying labels to multiple sides of pallets or boxes.

- Apply labels to one, two or three sides of box or pallet.
- Designed to work with irregular pallets and tolerances in material handling.
- Laser type sensor locates position of the area to be labeled.
- Optional stainless steel enclosure for tough environments.

Labeling Systems

Personalize Cases with Barcodes & Text

High Resolution Inkjet

Replace preprinted cases and cartons with large character printing on demand. Various printhead configurations, provide up to 4" high print at 300 dpi print resolution.

FoxJet ProSeries inkjet printers produce high quality, high resolution text, barcodes and graphic images.

Laser Marking on Cartons

Combining a DataLase solution with our Macsa lasers gives you the option of marking directly onto cartons. The DataLase material is printed directly onto the carton during converting and produces a color change when activated with a low power CO_2 laser.

Shipping Case Labeling for Retail

Some of the big retail companies, such as Walmart, have guidelines on labeling cases – often requiring that information is visible from more than one side of the case.

Our labeling systems can apply both leading and trailing edge corner-wrap labels so that labels can be seen on all four sides of the case.

With more flexibility and higher throughput, GS1 barcode labeling can be done on high speed production lines for perfect GTIN and GS1-128 barcode labeling.

PROMACH

... what it means for you

Working with ID Technology and other ProMach brands offers direct access to the leading solutions for your industry. When your team works with ProMach, you can be sure that the experience, in-depth knowledge, commitment to precision and a high degree of expertise goes into every solution, individually or when ProMach brands join forces.

By delivering best-in-class product brands across the entire packaging spectrum. By leveraging the knowledge of all these best-in-class family members. And by letting innovation flow across every business line, across every experience, to every customer everywhere: ProMach Performance is what happens when people and processes work as one.

Other companies can talk about innovative solutions but our ProMach family delivers the best in the industry every day!

Featured ProMach Solution

ORION®

Orion Packaging is a manufacturer and worldwide distributor of automatic stretch wrapping machines and semiautomatic stretch wrapping equipment.

Offering the most comprehensive line of end-of-line stretch wrapping pallet packaging products available, Orion Packaging leads the industry in pallet and stretch wrapping machinery technology. and continually sets the standard for durability, efficiency, flexibility, reliability and performance.

For more information about Orion Packaging and their products, visit http://www.orionpackaging.com/
ProMach's end of line packaging systems range from standalone applications to complex packaging systems. ProMach also offers fully integrated end-of-line systems that offer the shortest path to production.

Orion's Mini-System, an "all-in-one" robotic palletizer and automatic stretch wrapping machine integrates separate material handling and pallet packaging operations into one fully integrated stretch wrapping system.

Shaded regions represent areas served by our Label Converting Facilities

Nationwide Service and Support

Complimentary Limited Lifetime Equipment Warranty

For customers using ID Technology labels with our labeling systems, we provide a lifetime equipment warranty free of charge. Just ask us for details!

We pride ourselves in providing responsive nationwide customer service and support from any of our 17 regional sales, service and stocking facilities.

ID Technology technicians are PMMI Certified Trainers to ensure the highest standards of quality training are being met and unparalleled value is being given to the customer.
Our field service personnel are factory trained to service and support our full range of labeling, coding and marking equipment.

In addition to the field service team, ID Technology employs factory trained bench service technicians to accommodate timely depot service.

ID Technology boasts six label converting plants across the US and Canada that produce top quality labels and tags with local support.

ID TECHNOLOGY®

ID Technology, a member of ProMach's Labeling & Coding business line, is a leading provider for equipment, labels, consumables and expertise. Our customers depend on us to design, build and install the most effective labeling, coding and marking systems for their companies. ID Technology helps our packaging customers protect and grow the reputation and trust of their consumers. ProMach is performance, and the proof is in every package.
